

SECTION 10: Mushroom Production §205.201–§205.406

☐ Organic mushroom production ☐ Nonorganic mushroom production

1. List varieties of organic mushrooms being grown: _____

If applicable, list varieties of nonorganic mushrooms being grown: _____

2. Organic and nonorganic production site(s) must be separate defined areas and indicated on your farm map?

☐ NA ☐ Farm map is compliant

3. Describe your mushroom production steps:

4. If growing organic and nonorganic mushrooms, describe the specific management practices used to prevent commingling:

Spawn: ☐ Organic* ☐ Nonorganic**

List all spawn used and their sources:

*If spawn is organic, have documentation available at the inspection to verify compliance; purchase invoice and organic certificate.

**If nonorganic spawn is used, have documentation available at the inspection to verify that it is not a “genetically engineered” variety; it is not treated with any prohibited substances and record of your attempts to source organic spawn when an equivalent variety was not available.

Growing Materials: ☐ Wood derived materials- logs/sawdust ☐ Agricultural material other than wood

List all the materials used, and their sources, for your mushroom production:

How do you verify these wood materials were grown without prohibited materials for three years prior to tree harvest? _____

Is inoculation sealant used? ☐ Yes ☐ No If Yes, list type and source _____
