

## NHDAMF Materials Use Table §205.103, §205.203, 205.238, 205.600-606

Producers are responsible for using only products that meet NOP standards. During your inspection, be prepared to provide product labels, ingredient lists, invoices and other relevant documentation.

List all materials (inputs) you use or plan to use: soil amendments--fertilizers, minerals, micronutrients, compost, manure, growing media; inoculants and seed treatments; pest / disease / weed management substances and adjuvants; crop production aids, or any other materials applied to soil, crops, water, or stored products; as well as cleaners and sanitizers. Using products or inputs not listed on your materials list puts your certification at risk. Completely fill out each column or your OSP will be considered incomplete.

"OMRI" product verification shall only be used when the <u>specific brand name product</u> is on the <u>current</u> OMRI list. "OMRI" is not to be indicated for a generic category.

**FARM NAME:** 

FIELD INPUTS:						
Intended Purpose of Material: fertilizer, pesticide, etc.	Complete Product Name	Company Name/ Manufacturer as listed on product	Indicate Verification of Use: National List, OMRI, WSDA, PCO, NHDAMF, etc.	Initial each product to indicate you understand any Restrictions regarding use	P= Plan to Use H= Have On-Hand B= Both	For NHDAMF Review Only
