

SECTION 9: High Tunnel Crop and Cold Frame Production

- ❖ Complete this section if you produce crops in a high tunnel- an unheated, plastic-covered hoop-house structure used for crop production.

Describe your high tunnel type(s); include ID(s) and size(s) of each in the box below:

☐ NA

- ❖ Complete this section if you utilize cold frames in your production- a cold frame is a bottomless box that is set over plants and built to harden off plants and protect them from the cold.

Describe your cold frame type(s); include ID(s) and size(s) of each in the box below:

☐ NA
