New Hampshire Agriculture

- A viable, dynamic industry integrated within New Hampshire’s communities
- Diverse products and services with local to international markets
- Steward of nearly a half million New Hampshire acres
- Major influence on the State’s character and quality of life

New Hampshire agriculture has changed over the years. Today’s industry is quite diverse, encompassing many crop, livestock and specialty products. The value of New Hampshire’s agricultural industry is approximately $1.5 billion. This includes $336 million in direct sales of agricultural and other horticultural products and services and $1.2 billion in sales related to agritourism (direct and indirect spending).

Farming activity provides the fields, pastures and meadows that buffer New Hampshire’s residential and commercial development and affords the views of the hills, valleys and mountains. Without land kept open by farming, there would be no greenbelts around our towns and cities and without farming, there would be no barns, silos, or sugar houses that give our state its special character.

Some 4,400 individual operations qualify as commercial farms in New Hampshire, managing 470,000 acres including crop, pasture, maple and Christmas tree production, conservation and other agricultural uses. The state’s farms produce a wide variety of conventional bulk commodity crops, with milk and apples being the most significant. New Hampshire farms produce many specialty and horticultural crops for markets both within and beyond the state.

New Hampshire agricultural exports total over $94 million annually, including dairy, animal and horticultural products.

Dairy: Approximately 30 million gallons of milk are produced each year on 122 New Hampshire dairy farms. Purebred cattle are sold all over the world. **$53.5 million**

Ornamental Horticulture: This segment of New Hampshire agriculture includes over 500 businesses with greenhouse and nursery plant production and sod. **$53 million**

Horses: Pleasure horses are important to many aspects of New Hampshire recreation. Standardbreds and thoroughbreds raised and trained in New Hampshire are vital to racing. Horse farms are major consumers of local hay crops. **$50 million**

Hay/Forage & Field Crops: Hay, corn silage and other forage crops are produced annually on thousands of New Hampshire acres. These are grown for on-farm consumption by livestock and for cash crops as well. **$41.5 million**
Livestock: Beef, sheep, swine and poultry are among the types of livestock raised for home food supplies and commercial markets. Specialty livestock such as angora goats and rabbits, llamas and sheep are grown for wool and specialty fiber markets. Farm-raised fish and game including deer, bison and elk are gaining markets in restaurants and other outlets. New Hampshire egg and turkey products are favorites among local consumers looking for fresh, native foods. New Hampshire research farms have developed poultry strains that have influenced flocks worldwide. $40.5 million

Vegetables: Through direct-to-consumer outlets such as farm stands and markets, as well as regional supermarkets, New Hampshire growers provide a large variety of fresh, quality vegetables to local consumers. $10.3 million

Apples: New Hampshire orchards produce about one million bushels of apples annually that are sold throughout the Eastern U.S. and Europe. In addition, apple cider has become a major product line for many orchard operations. $8.2 million

Maple and Honey: An average of 90,000 gallons of maple syrup is produced each year in New Hampshire from over 400,000 maple taps. Beekeepers raise bees for honey and to provide important crop pollination services for other farmers. $7 million

Christmas Trees: New Hampshire grown Christmas trees, including Balsam and Fraser Fir and other species of pine and spruce, are harvested from across the state and sold throughout the region for fragrant holiday celebrations. Other evergreen products such as wreaths and roping are made at numerous farm operations and widely sold. $3 million

Berries & Other Fruit: By the quart, bushel or the pound, strawberries, raspberries, blueberries and other fruit such as peaches are enjoyed by New Hampshire consumers each year. Wild, low-bush New Hampshire blueberries are a baker’s favorite! $2.6 million

Supporting and promoting agriculture, and serving consumers and business for the benefit of the public health, environment, and economy.

Office of Commissioner
Shawn N. Jasper, Commissioner
271-3551
shawn.jasper@agr.nh.gov

The Office of Commissioner serves as the hub of the department--providing leadership, administrative and business support to all divisions, and statewide policy leadership and advocacy for agriculture. Administers departmental affairs, develops policy and oversees a number of programs which protect farmers, consumers and the environment. The commissioner is an ex-officio member of numerous boards, including the University System of New Hampshire Board of Trustees, Milk Sanitation Board, Agricultural Lands Preservation Committee, Pesticide Control Board, Land & Community Heritage & Investment Program, State Conservation Committee, and Current Use Advisory Board.

Division of Agricultural Development
Gail McWilliam Jellie, Director
271-3788
gail.mcwilliam.jellie@agr.nh.gov
Weekly Market Bulletin: marketbulletin@agr.nh.gov
Weekly Market Bulletin telephone: 271-1324

Our mission is to create market development opportunities for New Hampshire agricultural producers that result in increased sales of New Hampshire farm and food products. We work to inform the public of the value of the New Hampshire agricultural industry, including understanding the diversity of businesses and products and to encourage the purchase of local agricultural products.

We do this through promotional initiatives and marketing programs, including tradeshow opportunities and events, media and networking. Numerous publications, directories and market information are available in printed formats and on the internet. The division also works with various trade organizations throughout the state and country to encourage economic development activities that benefit New Hampshire agricultural businesses.

The division publishes the Weekly Market Bulletin for the farm community, operates the New Hampshire Building at the Eastern States Exposition and is a presenting sponsor of the NH Farm & Forest Exposition.
Division of Animal Industry
Stephen K. Crawford, DVM, State Veterinarian
271-2404
stephen.crawford@agr.nh.gov

The Division is responsible for the prevention and control of contagious and infectious diseases of livestock and poultry in the state. The core missions are livestock and poultry health, emergency preparedness and response, food safety. Some of these duties are completed in cooperation with USDA, while most are the responsibility of the State. The division is lead state agent for State Emergency Operations Plan Emergency Support Function 11 Agriculture, Cultural, and Natural Resources and is involved in many public health and food safety activities and policy discussions (e.g. rabies, EEE, Salmonella, etc.). The division licenses pet shops, animal shelters, livestock dealers, poultry dealers and people feeding garbage to swine, and assists law enforcement officers with the investigation of cruelty to animals. The division utilizes the expertise and assistance of a USDA Veterinary Medical Officer within various regulatory programs.

The division is led by the state veterinarian who also oversees the Board of Veterinary Medicine and the Animal Population Control Program, and shares joint responsibility with the University of New Hampshire/NH Agricultural Experiment Station for the NH Veterinary Diagnostic Laboratory. This provides a comprehensive approach to the protection of public health and the economy from threats of animal disease origin.

Division of Pesticide Control
David J. Rousseau, Director
271-3550
pesticides@agr.nh.gov
david.rousseau@agr.nh.gov

Regulates all aspects of the sale, use, and manufacture of pesticides in new Hampshire, under the direction of the Pesticide Control Board with the intention of protecting New Hampshire citizens and the environment while recognizing the benefits of the proper management of pesticides. This is accomplished through the registration of pesticides, licensing of pesticide applicators and dealers, issuance of special permits, promotion of integrated pest management practices, and the enforcement of state and federal pesticide regulations.
Division of Plant Industry  
Piera Siegert, State Entomologist  
271-2561  
piera.siegert@agr.nh.gov  

The primary mission of the division is to promote and protect plant health by curtailing the spread of dangerous insects, diseases, and weeds moved in commerce. The Division of Plant Industry works with citizens, agricultural producers like farmers, beekeepers and nurserymen, the green industry, and the wood products industry, to reduce the introduction and spread of destructive plant pests moved in trade. This is achieved through licensing, certification, and audit-based programs, inspections, pest surveys, and outreach. The division also conducts science-based surveys targeting specific exotic plant pests, diseases, and weeds that are identified as threats to agricultural, landscaped, and natural habitats.

Division of Regulatory Services  
Jennifer Gornnert, Director  
271-3685/7761  
jennifer.gornnert@agr.nh.gov  

The mission of the division is to assure regulatory compliance in the marketing of certain farm products and agricultural commodities, and enhance market access for farmers by providing state and federal quality and process verification programs.

The Division’s work consists of a number of diverse programs, including the review and inspection of the production, processing, packaging and marketing of agricultural products for compliance with state and federal laws and rules pertaining to grade, labeling and quality standards. Covered agricultural products include: maple products, apples, cider, honey, shell eggs, and raspberries. Regulatory Services regulates agricultural commodities through registration and labeling requirements, and through sampling and analysis. Such commodities include: commercial feed & pet food, commercial fertilizer, liming materials, horticultural growing media, and seeds. The Division takes appropriate action when a noncompliance or violation is found.

Regulatory Services also investigates complaints involving the mismanagement of agricultural nutrients and provides technical and financial assistance to landowners with grants to support efforts to minimize adverse effects to water of the state. Inspectors monitor farmland enrolled in the state’s Agricultural Lands Preservation program. The division implements three federal programs: the National Organic Certification program, the Good Agricultural Practices program, and the Country of Origin Labeling program. The National Organic Certification Cost Share Programs are also administered by the Division.
The Division is responsible for regulating commodities sold by weight or measure in state commerce, striving to ensure and promote accuracy and equity in the marketplace for both consumers and businesses.

The Division provides licensing services for service technicians, weighmasters, and 3,200 businesses with various commercial devices. The Division also provides education, training and compliance outreach to licensees. The Division’s auditing programs and enforcement services assist in verifying compliance with RSA 438 and RSA 339:30-a.

The Division investigates complaints alleging problems with determinations of quantity in commercial transactions including, but not limited, to: (1) accuracy of metered devices (e.g. gas pumps); (2) accuracy of weighing devices including scales used in direct sale transactions (e.g. cash register scales, deli scales, candy scales, farm stand scales, vehicle scales); (3) accuracy of scanning devices (e.g. accurate pricing at register); (4) packaged commodities (e.g. net weight); and (5) price posting of commodities (e.g. price per pound).

The Division also operates the State’s Metrology Laboratory. The laboratory is the custodian of the official mass, volume and length standards for the State and provides calibration services to the legal weights and measures community including both the public and private sectors.

The UNH College of Life Sciences & Agriculture (COLSA) provides undergraduate and graduate degree programs, research, and outreach. It houses the Thompson School of Applied Science, as well as the New Hampshire Agricultural Experiment Station (NHAES) and the New Hampshire Veterinary Diagnostic Laboratory (NHVDL). The NHAES facilities and funds research programs related to agriculture and natural resources to serve the needs of the state, region and nation. The NHVDL helps to monitor and control important animal diseases by providing diagnostic services and information.

USD A Natural Resources Conservation Service & County Conservation District Offices

County Conservation District Offices:
The Conservation Districts assist towns, landowners, farmers, foresters, developers and others to properly plan and conserve the wise use of land and water resources; the Districts also sponsor natural resource conservation programs to bring issues and opportunities of conservation to the attention of the public. Soils information, including Soil Potential Index (SPI) ratings, soils overlays and “Minimum Impact Wetlands Permits” process assistance, are also available through conservation district offices.

USD A Natural Resources Conservation Service:
USDA’s Natural Resources Conservation Service, a federal agency working through NH’s local conservation districts provides technical and financial assistance through a partnership effort, lead by NH’s conservation districts and includes natural resource conservation efforts related to soil and water erosion and erosion control, water quality, stream bank protection, wetlands restoration, farmland protection, forestland improvement, wildlife habitat restoration, flood control and soil and resource inventories.
